DETAILED ACTION

Election/Restrictions

1. Claims 7-17, 20-21 and 24-25 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5. Claim 29 is directed to an invention that is independent or distinct from the invention originally elected for the following reasons: depends from a non-elected SpeciesV.

Accordingly, claim 29 is withdrawn from consideration as being directed to a non-elected invention.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what “a means for adjusting the relative positions of first and second legs” encompasses. Figure 2 illustrates that first and second legs are fixed to the body 52.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-6, 18-19, 22-23, 26-27 and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Brutscher et al.

Brutscher discloses the invention including a body/bridge 40, a first leg 18 forming a first leg non-slip work piece-contacting surface, a second leg 12 forming a second leg non-slip work piece-contacting surface, a center leg 20 forming a center leg non-slip work piece-contacting surface, a handle 11, first and second tunnels (see Fig. 13) and a means 22 for adjusting a width of the tunnel.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cowley, Johnson, Kowalchuk and Hundegger are cited to show related device.
